

Nodiadau Anlinol

Ystyr nodiadau anlinol, yn fras, yw unrhyw ddull o gymryd nodiadau nad yw mewn trefn gronolegol .

Nod nodiadau anlinol yw grwpio pynciau, syniadau, a pynciau trafod allweddol yn nhrefn perthnasedd neu gysylltiad.

Y dull mwyaf cyffredin o wneud hyn yw trwy fapiau meddwl .

Mae nodiadau anlinol yn helpu i ddatgymalu gwybodaeth yn ddarnau haw

frig y dudalen, a chrynodeb ar y gwaelod.

Ar y dudalen nesaf mae map meddwl syml yn darlunio sut y gellid defnyddio map felly fel nodiadau darlith:

Enghraifft o nodiadau anlinol

Dyddiad 10/10/15. Modiwl: Straen a thralod.

The diagram consists of a grid background with several layers of information:

- Top Layer (Cross-section):** Shows a cross-section of a river channel. The central part is a deep channel, and the right side is a shallower area. There are various symbols and lines indicating different features.
- Middle Layer (Plan View):** Shows a plan view of the river channel. The channel is represented by a series of lines and symbols, indicating its width and depth. There are also some handwritten notes and symbols.
- Bottom Layer (Notes):** Contains handwritten notes in Welsh. On the left, it says "amner aol abgaw" and "geirbyddio a restr". On the right, it says "4% disgwyd ar waf a" and "a Btwn 70% ffrwyth 50% pwr".

Handwritten notes in Welsh:

- amner aol abgaw
- geirbyddio a restr
- 4% disgwyd ar waf a
- a Btwn 70% ffrwyth 50% pwr
